

SCHEDULE OF POSTER SESSIONS

SATURDAY, MAY 5

2:30 PM – 3:45 PM

Asthma, Lung Inflammation, and Immunity
Autoimmune Therapeutics: Microbiome, Diet, and Metabolism
Autoimmunity, Hypersensitivity, and Tolerance
B Cell Biology
Basic Autoimmunity: B Cells and Germinal Centers
Basic Autoimmunity: Innate Immune Mechanisms
Immune Memory and Aging
Immune Responses to Viruses in the Respiratory Tract
Inflammation and Disease
Influence of Cytokines and Chemokines on Regional Immunity
Innate Immune Cells and Mechanisms
Innate Leukocyte Responses
Macrophages and Myeloid and Dendritic Cells in Tumor Immunity and Immunotherapy
Microbial, Parasitic, and Fungal Immunity: Fungal and Parasitic Immunity
Mucosal Immune Regulation by Microbiota and Diet
Pathogen Control and Evasion Strategies
T Cell Responses During Acute and Chronic Virus Infections
T cells in Tumor Immunity and Immunotherapy
T Lymphocytes and Tregs: Activation, Differentiation and Tolerance
Therapeutic Antibodies and Immunomodulators
Transplantation Immunology
Veterinary and Comparative Immunology

SUNDAY, MAY 6

2:30 PM – 3:45 PM

Antigen Processing and Presentation
B Cells and B/T Cell Interactions
Basic Autoimmunity: Novel Molecules
Basic Autoimmunity: Regulatory T Cells
Cellular Immune Responses at the Mucosa
Combination Therapies for Immuno-Oncology
Efficacy of Vaccines and Immunotherapies: Cellular and Molecular Regulation
Food Allergy and Hypersensitivity
Hematopoiesis and B Cell Development
Hematopoietic Cancers
ILCs and IELs: Regulators of Mucosal Immunity
ILCs in Tumor Immunity and Immunotherapy
Immune Mechanisms of Human Disease
Immunology Education
Inflammasomes
Innate and Adaptive Immunity to Viruses
Innate Immunity
Innate Immunity to Microbes I
Leukocyte Adhesion and Migration
Mast Cell Biology
Metabolome, Host Defense, and Tissue Injury
Microbial, Parasitic, and Fungal Immunity: Bacterial Immunity
Molecular Mechanisms of T Helper Cell Differentiation and Responses
Novel Therapeutic Approaches in Neuro-Inflammation
Peripheral Lymphocyte Development and Homeostasis
Regulation of Innate and Cytotoxic Lymphocyte Responses: Molecular Mechanisms
T Cell Signaling: Membrane to Nucleus
Technological Innovations I

POSTER PRESENTERS

- Authors must set up their posters between 7:30 AM and 9:00 AM on the day of their presentation.
- Posters must remain up until 3:45 PM and then must be removed by 4:30 PM when the Exhibit Hall closes.
- Do not leave personal belongings, poster containers, or any material under the poster boards or in the poster area as they may be discarded.
- AAI is not responsible for articles left in the poster area.

Recording any presentation or session (oral or poster) by any means (photographing, audiotaping, or videotaping) **is prohibited** except by an AAI-authorized agent for official purposes, or by first authors who want to photograph their own poster presentations. Violators risk expulsion from the meeting.

MONDAY, MAY 7

2:30 PM – 3:45 PM

Basic Autoimmunity: Microbial Connections

Basic Autoimmunity: Role of T Cells

Cell Therapy

Human Host Defense

Immune Responses During Acute and Chronic Virus Infections

Immunometabolism in Tumor Immunity and Immunotherapy

Inflammatory Mediators at Mucosal Surfaces

Innate Immune Sensing and Signaling

Innate Immunity to Microbes II

Lymphocyte Activation, Differentiation, and Regulation

Mechanisms of Cytokine and Chemokine Function and Regulation

Metabolism and Molecular Immunology

Myeloid Cells, Antigen Presentation, and Regulatory Factors During Virus Infections

Novel Vaccines and Immunotherapies Against Infectious Diseases

Regulation of Immunity in the Skin and Lung Mucosa

Regulatory Mechanisms of Innate Immune Responses

T and NKT Development

Technological Innovations II

The Tumor Microenvironment

Tolerance Induction, Signaling, and Cell-Based Therapy in Autoimmunity

Treatment Strategies in Systemic Autoimmunity

Vaccines
